

HVAC (Chiller) Systems

Product Name: Water Cooled Screw Chiller
Capacity: 75 to 450 Ton with R-134a Refrigerant.

Product Name: Water Cooled Centrifugal Chiller
Capacity: 142 to 4000 Ton with R-123 Refrigerant.
381 to 1080 Ton with R-134a Refrigerant

Product Name: Air-Cooled Screw Chiller
Capacity: 120 to 400 Ton with R-134a Refrigerant.

Product Name: Packaged Air-Cooled Chiller
Capacity: 3 to 50 Ton

VRF Variable Refrigerant Flow

Product Name: Outdoor Unit

Origin: USA / Japan / Thailand / China

Assemble: India / Thailand / China

Capacity: Single 4.55 to 25.58 Ton, Combination 19.33 to 47.75 Ton

Product Name: Ducted Type Fan Coil Unit (FCU)

Origin: USA / Japan / Thailand / China

Assemble: India / Thailand / China

Capacity: 0.62 to 8.0 Ton

Product Name: Wall Mounted Type

Origin: USA / Japan / Thailand / China

Assemble: India / Thailand / China

Capacity: 0.62 to 2 Ton

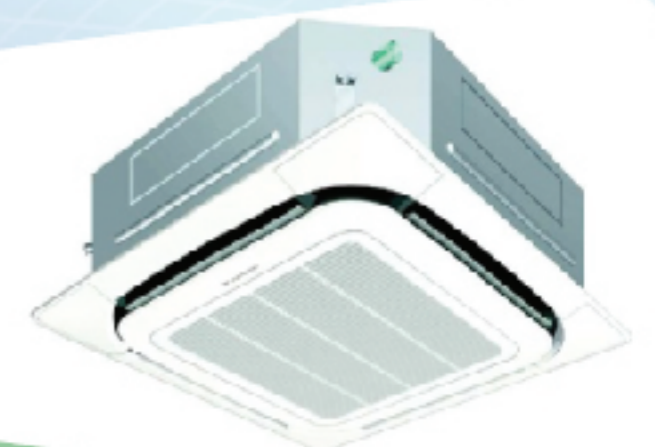

Product Name: Cassette Type

Origin: USA / Japan / Thailand / China

Assemble: India / Thailand / China

Capacity: 0.8 to 5.0 Ton

Product Name: Ceiling Type

Origin: USA / Japan / Thailand / China

Assemble: India / Thailand / China

Capacity: 1.0 to 5.0 Ton

Product Name: Floor Standing Type

Origin: USA / Japan / Thailand / China

Assemble: India / Thailand / China

Capacity: 4.0 to 16.0 Ton

Split Type Air-Conditioners

Product Name: Ducted Type Fan Coil Unit (FCU)

Origin: USA

Assemble: Thailand

Capacity: 1.5 to 20.0 Ton

Product Name: Air Handling Unit (AHU)

Origin: USA

Assemble: Thailand

Capacity: 1.5 to 5.0 Ton

Product Name: Rooftop Packaged Unit

Origin: USA/Thailand

Capacity: 2.0 to 20 Ton

Product Name: Wall Mounted Type

Origin: USA

Assemble: Thailand

Capacity: 1.0 to 3.0 Ton

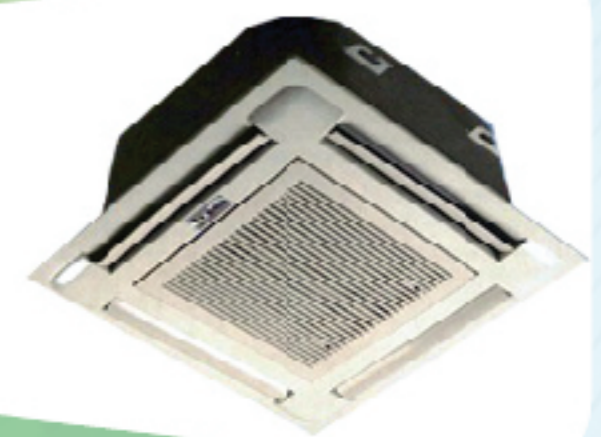

Product Name: Cassette Type

Origin: USA

Assemble: Thailand

Capacity: 2.0 to 5.0 Ton

Product Name: Ceiling Type

Origin: USA

Assemble: Thailand

Capacity: 2.0 to 5.0 Ton

Product Name: Floor Standing Type

Origin: USA

Assemble: Thailand

Capacity: 3.0 to 20.0 Ton

Dehumidifier

Brand: *TROTEC* *DEHUTECH*

Origin: Germany / Sweden

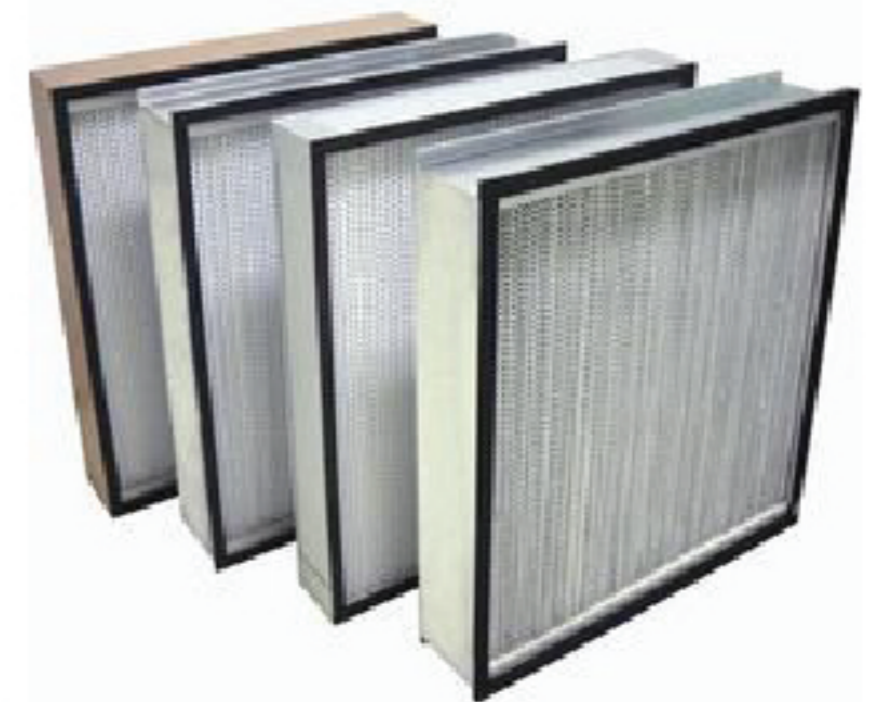

Capacity: 160 m³/h-27900 m³/h

Filters

Brand: *AAF/JAF*

Origin: Malaysia

Filters are used mainly to clean the supply air. Basing on the requirement of purity of the air, different types of air filters are used. Such as: Pre-filter, Bag-filter, Hepa-filter Etc.

Filters are used mainly in following sectors:

Company Profile

It is a great pleasure to introduce our company '**Techno HVAC System Ltd**' as one of the best air conditioning house in the country. We have acquired group experience of working with so many **Multinational, Government, Semi government, Bank and Private organizations**. Our engineers, marketing people and technicians are well skilled to satisfy our valued customers. We used to provide with all types of HVAC System like Chiller System , VRF, Package & Split type air conditioners including installation and servicing. We are also ready to provide you with air conditioning consultancy services if needed at free of cost. We are agreed to sign an agreement in the non-judicial stamp regarding our warranty period. We also confirm you that our air conditioners are originated from USA/EU/JAPAN/THAILAND.

Business Expansion

The volume of our business expanding year to year is the evidence of our quality and service. We believe in working with the same customer for years together. HVAC business is not a matter of one or two year business. Our clients believe us because we believe in the best. They speak for us, which makes easy to do business all over Bangladesh. During the last Five years we have a mentionable growth. We have planned to establish sales centers in the divisional cities to cover the country-wide demand.

Business Ethics

- » Maintaining honesty in every stage of our business affairs
- » Ensuring health environment by providing with quality air condition equipments.
- » Building up relationship with our customers forever so that they invite us for the same service as and when required.
